

Mercury

- Distance from Sun: 1st closest
 - Smallest planet
 - No atmosphere
- Temperatures: -180°C to 430°C

Venus

- Distance from Sun: 2nd closest
 - Hottest planet
 - Spins backwards
 - Similar size to Earth

Earth

- Distance from Sun: 3rd closest
- Only planet with liquid water
 - Has 1 moon
- 71% covered in water

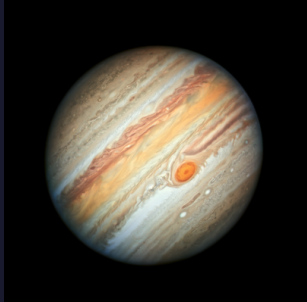

Mars

- Distance from Sun: 4th closest
 - Called the Red Planet
- Tallest volcano (Olympus Mons)
 - 2 small moons

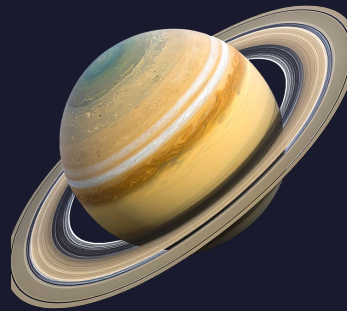

Jupiter

- Distance from Sun: 5th closest
 - Largest planet
- Great Red Spot storm
- 95 moons

Saturn

- Distance from Sun: 6th closest
 - Famous rings
- Could float in water
- 146 moons

Uranus

- Distance from Sun: 7th closest
 - Rotates on its side
 - Made of ice
- 28 moons

Neptune

- Distance from Sun: 8th closest
 - Windiest planet
- Furthest from sun
- 16 moons
