

MISSION: ADAPT & SURVIVE

Adaptation Matching

Junior Rangers Science Lab

Every animal has special features that help it survive in its environment.

These are called adaptations. Draw a line to match each animal with its adaptation.

Animals

1. Camel

2. Polar Bear

3. Cactus

4. Starfish

5. Chameleon

6. Arctic Fox

Adaptations

A. Changes colour to hide from predators

B. Stores water in its stem to survive the desert

C. Has thick white fur for warmth and camouflage in snow

D. Has a hump that stores fat for long journeys without water

E. Uses tube feet with suction to grip rocks in crashing waves

F. Grows a thick white winter coat, then a brown summer coat

A time I had to adapt:

Think of a time when something changed in your life (new school, new friend, new challenge). How did you adapt?

Design Your Own Animal!

Imagine an animal that lives in the tidal zone (hot sun AND crashing waves). Draw it below and label 3 adaptations it would need.

Scout Says:

Every living thing on Earth has adapted to survive. Even YOU adapt every day - to new challenges, new places, and new experiences. That's what makes you strong!
